 - 4.4 Blog & Contact Pages
5. Output and screenshots
6. Conclusion

Acknowledgement

I would like to express my sincere gratitude to my teacher Ms. Priyanka for their continuous guidance, encouragement, and support throughout the completion of this project. Their valuable suggestions, constructive feedback, and clear explanations helped me gain a better understanding of software testing and its real-world applications.

I am also thankful to my institution for providing the necessary resources and a positive learning environment that made this project possible. The facilities and opportunities provided played an important role in enhancing my practical knowledge and skills.

I would like to extend my heartfelt thanks to my friends and family for their constant encouragement, motivation, and moral support during the course of this work. Their support helped me stay focused and complete the project successfully.

Sukhleen Kaur

Introduction

Software testing is an essential process in software development that ensures the system functions correctly and meets user requirements. It involves verifying and validating different components of a system to detect errors, improve performance, and enhance user experience.

In this report, the EduBytes website—an online learning platform—has been tested. The website provides features such as course browsing, user registration, and course enrollment. The testing process focuses on evaluating the functionality of various pages including the landing page, courses page, enrollment module, and contact section.

The objective of this testing is to ensure that all features work as expected, input validations are properly implemented, and users can interact with the system smoothly without errors. This report includes detailed test cases, scenarios, and expected outcomes based on manual testing techniques.

Objectives

- To test the responsiveness of the website on different screen sizes
- To verify the working of buttons and links across all pages
- To check the proper functioning of the countdown timer
- To validate the enrollment popup and its behavior
- To ensure correct display of course prices and details
- To test the payment form fields and input formats
- To verify error messages for invalid or empty inputs
- To check the loading performance of web pages
- To ensure consistency in UI design and layout across pages
- To test the closing and opening of modal windows (popups)

Software Requirements:

- **Operating System:** Windows 10/11
- **Frontend Technologies:** HTML, CSS, JavaScript
- **Browser:** Google Chrome / Microsoft Edge
- **Testing Method:** Manual Testing
- **Tools Used:**
 - Visual Studio Code (for development)
 - Web Browser Developer Tools (for inspection and debugging)

Implementation

Test Cases:

1) Landing Page (index.html)

TC Id	Field	Test Scenario	Test Data	Expected Result	Actual Result	Status
TC_LP_01	Hero Links	Verify "Visit Courses" button	—	Redirects to courses.html	User redirected to courses page	PASS
TC_LP_02	Countdown	Timer Synchronization	—	Timer decrements in real-time	Seconds value updated every second	PASS
TC_LP_03	Full name	Registration Validation	Sukhleen Kaur	Input accepted	Name accepted without error	PASS
TC_LP_04	Email	Registration Validation	Sukhleen123@gmail.com	Input accepted	Email verified as valid format	PASS
TC_LP_05	Phone	Registration Validation	9865743678	Input accepted	10-digit numeric value accepted	PASS
TC_LP_06	Submit	Mandatory Field Check	(Blank)	Error "Please fill in all fields"	Error message displayed in red	PASS

The screenshot shows the EduBytes homepage. At the top, there's a navigation bar with the EduBytes logo and a search icon. Below the navigation bar, there's a hero section with a background image of a person working on a laptop. The hero section contains the text "Get 3 Online Courses for free" and a large "Register Now" button. To the right of the hero section, there's a "Create Free Account Now!" form with input fields for Name, Email Address, and Phone Number, and a "Submit Form" button. Below the hero section, there's a footer with four columns: "Top Products", "Quicks Links", "Features", and "Resources". Each column lists various services and links.

2) Courses Page (courses.html)

TC_Id	Field	Test Scenario	Test Cases	Expected Result	Actual Result	Status
TC_CR_01	AI Course	Verify Price Display	—	Displays Rs. 5800	Price shown matches image	PASS
TC_CR_02	ML Course	Verify Price Display	—	Displays Rs. 5850	Price shown matches image	PASS
TC_CR_03	Programming	Enrollment Trigger	—	Opens Enrollment Modal	Enrollment pop-up appeared	PASS
TC_CR_04	Modal	Close Functionality	—	Modal closes successfully	Window closed immediately	PASS

3) Enrollment & Payment Page

TC_Id	Field	Test Scenario	Test Data	Expected Result	Actual Result	Status
TC_PY_01	Item Name	Product Verification	—	Shows "Programming - Rs. 3700"	Correct item and price shown	PASS
TC_PY_02	Card Name	Payment Validation	Sukhleen Kaur	Input accepted	Name displayed in field	PASS
TC_PY_03	Card Number	Payment Validation	16-digit number	Input accepted	Digits accepted correctly	PASS
TC_PY_04	Expiry Date	Format Validation	Dec-28	Format accepted	Accepted MM/YY format	PASS
TC_PY_05	CVV	Masking Check	243	Input is masked	Text replaced by dots/asterisks	PASS
TC_PY_06	Method	Alternative Payment	UPI	Method is highlighted	UPI button border changed color	PASS
TC_PY_07	Submit	Final Transaction	—	Processed successfully	Confirmation message displayed	PASS

4) Blog & Contact Pages

TC ID	Field	Test Scenario	Test Data	Expected Result	Actual Result	Status
TC_BG_01	Blog Links	Content Redirection	—	Navigates to full article	Redirected to full blog content	PASS
TC_BG_02	Contact Name	Feedback Validation	Sukhleen	Input accepted	Name field populated	PASS
TC_BG_03	Message	Support Request	"Need Java info"	Input accepted	Message field populated	PASS
TC_BG_04	Send	Form Submission	—	Message successfully sent	Confirmation alert appeared	PASS

Conclusion

The EduBytes website was tested successfully using manual testing techniques. All major functionalities such as navigation, course listing, registration form, and enrollment process were verified and found to be working properly.

The website provides a simple and user-friendly interface, making it easy for users to explore courses, register, and enroll without confusion. The layout is well-structured, and the design ensures smooth interaction across different sections of the website.

During testing, it was observed that features like the countdown timer, course display, and enrollment popup function correctly. Form validations are implemented; however, they can be further improved by providing more specific error messages and better feedback after successful submissions.

Overall, the EduBytes website is efficient, functional, and meets the essential requirements of an online learning platform. With a few improvements, it can provide an even more robust and seamless experience to users.
