

Worksheet No. - 04

Student Name: Sukhleen Kaur

Branch: MCA

Semester: 2nd

Subject Name: Software Testing

UID: 25MCA20031

Section/Group: 25MCA-6B

Date of Performance: 02.03.2026

Subject Code: 25CAH-654

Aim/Overview of the practical: a) To design and validate test cases for the Login page of classic web applications (Rediff / LinkedIn) using the Decision Table Testing technique.

Objective: To design and validate test cases for the Login page of classic web applications such as Rediff and LinkedIn using the Decision Table Testing technique, by identifying different combinations of valid and invalid input conditions and verifying the corresponding system outcomes.

Procedure/Algorithm/Code

Conditions Identified

C1: Email/Mobile number is valid

C2: Password is valid

Actions Identified

A1: Login successful

A2: Error message displayed

Decision Table

Explanation of Rules

R1

- **Valid Email/Mobile:** Yes
- **Valid Password:** Yes
- **Action:** Login Successful

R2

- **Valid Email/Mobile:** Yes
- **Valid Password:** No
- **Action:** Error Message Displayed

R3

- **Valid Email/Mobile:** No
- **Valid Password:** Yes
- **Action:** Error Message Displayed

R4

- **Valid Email/Mobile:** No
- **Valid Password:** No
- **Action:** Error Message Displayed

Conditions / Rules

Conditions / Rules	R1	R2	R3	R4
Valid Email/Mobile	Y	Y	N	N
Valid Password	Y	N	Y	N

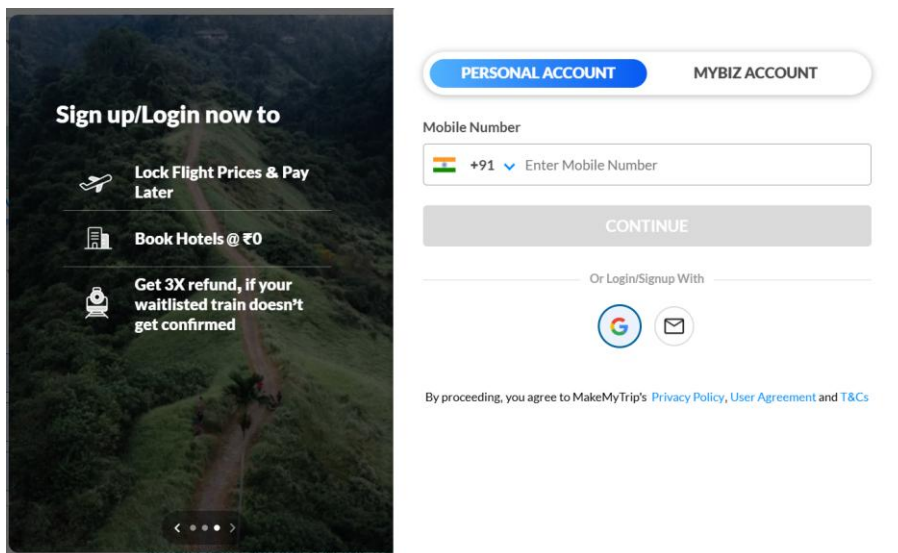

Actions

Actions	R1	R2	R3	R4
Login Successful	Y	N	N	N
Error Message Displayed	N	Y	Y	Y

Derived Test Cases

Test Case ID	Email/Mobile	Password	Expected Result
TC_MMT_01	Valid	Valid	Login successful
TC_MMT_02	Valid	Invalid	Error message displayed
TC_MMT_03	Invalid	Valid	Error message displayed
TC_MMT_04	Invalid	Invalid	Error message displayed

Output

Aim/Overview of the practical: b) To perform live testing on applications from different domains such as E-commerce, Educational, Travel, and Healthcare to identify functional and usability defects.

Objective: To perform live testing on applications from different domains such as E-commerce, Educational, Travel, and Healthcare in order to identify functional defects and usability issues, and to evaluate the overall performance and user experience of the applications.

Procedure/Algorithm/Code

Fields to be Tested: MakeMyTrip – Hotel Booking Page

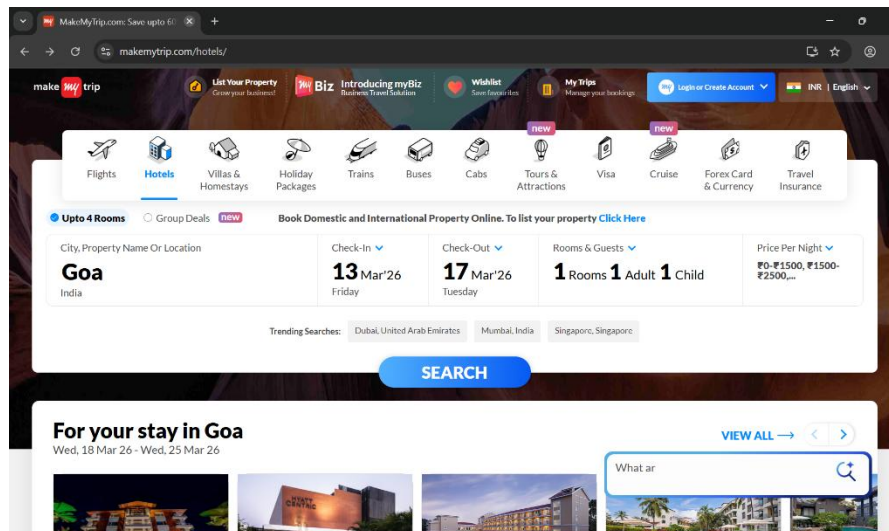

- City / Property Name / Location
- Check-in Date
- Check-out Date
- Rooms
- Adults
- Children
- Price Per Night Filter
- Search Button

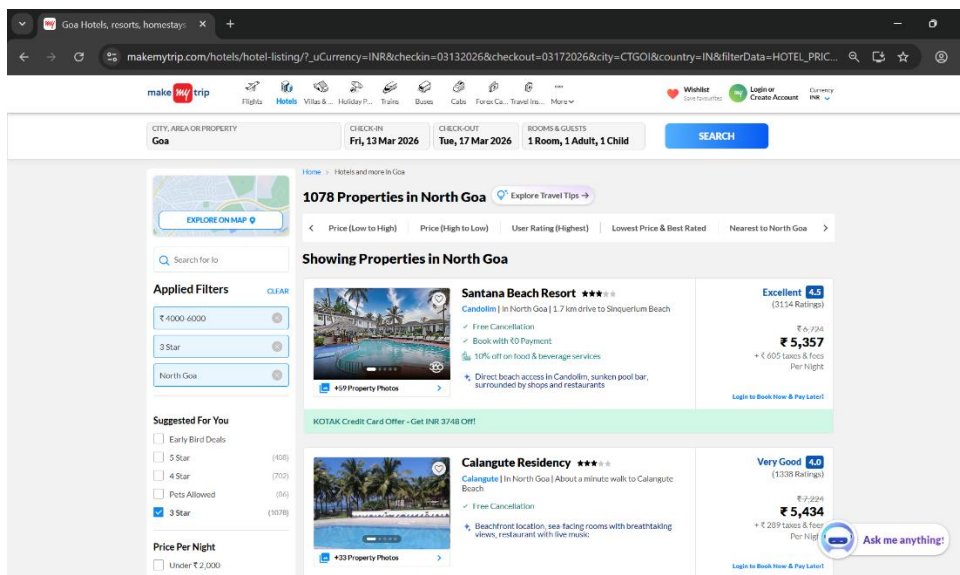

Test Cases: MakeMyTrip

TC ID	Field	Test Scenario	Valid Test Data	Expected Result	Result Status
TC_MMT_P01	City	Enter valid city name	“Goa”	System shows hotel results for Goa	Pass

TC ID	Field	Test Scenario	Valid Test Data	Expected Result	Result Status
TC_MMT_P02	Check-in Date	Select valid future date	13 Mar 2026	Date accepted	Pass
TC_MMT_P03	Check-out Date	Select date after check-in	17 Mar 2026	Stay duration calculated correctly	Pass
TC_MMT_P04	Rooms	Select 1 room	1	Room selection updated successfully	Pass
TC_MMT_P05	Adults	Select 1 adult	1	Adult count updated	Pass
TC_MMT_P06	Children	Select 1 child	1	Child count updated	Pass
TC_MMT_P07	Price Filter	Select ₹4000–₹6000 range	Valid price range	Only hotels within selected range displayed	Pass
TC_MMT_P08	Search Button	Click search after entering all valid details	Valid data filled	Hotel listing page displayed	Pass

Output

Learning outcomes (What I have learnt):

1. Understood the concept and application of Decision Table Testing.
2. Designed and validate test cases for login functionality using different input combinations.
3. Performed live testing on real-world applications from multiple domains.

Evaluation Grid:

Sr. No.	Parameters	Marks Obtained	Maximum Marks
1.	Demonstration and Performance		12
2.	Worksheet		8
3.	Viva		10
