

Worksheet No. - 06

Student Name: Sukhleen Kaur

Branch: MCA

Semester: 2nd

Subject Name: Software Testing

UID: 25MCA20031

Section/Group: 25MCA-6B

Date of Performance: 07.04.2026

Subject Code: 25CAH-654

Aim/Overview of the practical: A). Convert issue to Sub-task and Vice Versa, Edit, Email, Label, and Move an Issue

Objective: The objective of this task is to understand and perform various issue management operations effectively. It includes learning how to convert an issue into a sub-task and vice versa, edit issue details as required, and send updates through email notifications. Additionally, it focuses on applying labels for better organization and categorization of issues, as well as moving issues between different projects or workflows. Overall, the aim is to improve efficiency and accuracy in managing and tracking issues within a project management system.

Procedure

1. **Create an Issue:** Login to JIRA → Select Project → Click Create → Choose issue type (Bug/Task/Story) → Provide summary and description → Create.

The screenshot shows the 'Create Story' form in JIRA. The form includes the following fields and options:

- Space:** A dropdown menu with 'Experiment 6 (E6)' selected.
- Work type:** A dropdown menu with 'Story' selected. A link 'Learn about work types' is visible below.
- Status:** A dropdown menu with 'To Do' selected. A note below states 'This is the initial status upon creation'.
- Summary:** A text input field containing 'Story has been created'.
- Description:** A rich text editor area with a toolbar and a placeholder 'Improve description'.
- Buttons:** 'Create another' (checkbox), 'Cancel', and 'Create' (blue button).

2. **Convert Issue to Sub-task:** Open the issue → Click More (•••) → Select Convert to sub-task → Choose parent issue → Confirm.

5. **Email an Issue:** Open issue → Click Share → Enter email address or JIRA user → Add message → Send.

6. **Add / Edit Labels:** Open issue → Click Labels field → Add relevant label (e.g., UI, Backend, Regression) → Save.

7. **Move an Issue:** Open issue → Click More (•••) → Select Move → Choose target project and issue type → Update required fields → Confirm.

Aim/Overview of the practical: B). Jira Dashboards, Search Tasks using various search features provided by JIRA, log work hours and set label in JIRA

Objective: The objective of this task is to understand and utilize various features of JIRA for effective project management. It includes learning how to use JIRA Dashboards to monitor project progress, search tasks efficiently using different search features, log work hours to track time spent on tasks, and apply labels for better organization and categorization of issues. Overall, the aim is to enhance productivity and improve task tracking within the project management system.

Procedure

Jira Dashboards:

1. Accessing Dashboards:

- Log in to your Jira instance.
- Navigate to the "Dashboards" dropdown in the top menu.
- Select "View all Dashboards" or a specific dashboard.

2. Creating a Dashboard:

- Click on "Create Dashboard."
- Choose the dashboard layout.
- Add gadgets (charts, filters, etc.) to the dashboard.
- Save the dashboard.

3. Editing a Dashboard:

- Open the dashboard you want to edit.
- Click on "Edit Dashboard."
- Add or remove gadgets as needed.
- Save the changes.

4. Log Work from Issue View:

- Open the issue you want to log work on.
- Click on the "Log Work" button.
- Enter the time spent, work description, and other details.
- Save the work log.

5. Set Labels from Issue View:

- Open the issue where you want to set labels.
- Click on "Labels" and enter the desired labels.
- Press "Enter" to apply the labels.

Aim/Overview of the practical: C). Clone and link an issue, import export data, generate different types of reports. Procedure.

Objective: The objective of this experiment is to understand and perform advanced features of Jira, including cloning and linking issues, importing and exporting project data, and generating different types of reports. These activities help in improving issue management, maintaining data consistency, and analyzing project progress effectively. By performing these tasks, users

gain practical knowledge of handling real-world project workflows, enhancing collaboration, and making data-driven decisions for better software project management.

Procedure

1. Clone an Issue

- Cloning means creating a copy of an existing issue:
 - Open any issue (e.g., PROJ-1)
 - Click ⋮ (More options)
 - Select Clone
 - Edit details (summary, assignee, etc.)
 - Click Create

Clone E6-4
Required fields are marked with an asterisk *

Include
☐ Clone sprint value

Cancel Clone

2. Link an Issue:

- Open the source issue.
- Click on the "More" button.
- Select "Link."
- Choose the link type (blocks, is blocked by, relates to, etc.).
- Search and select the linked issue.
- Add a description if necessary.
- Click "Link."

3. Import Data:

- Navigate to "Issues" > "Import Issues" in the top menu.
- Choose the appropriate import method (CSV, JSON, XML, etc.).
- Follow the steps of the import wizard.
- Map the fields from your file to Jira fields. Export Data:
- Open the issue navigator or a filter result.
- Use the "Export" dropdown to choose the export format (CSV, Excel, Word, PDF, etc.).
- Adjust the export settings if necessary.
- Click "Export" to download the file.

CSV File import

File import Setup Fields Values

File import

You are about to start the CSV import. To learn more about it, please see our [CSV importer documentation](#).

CSV Source File
25MCA20031__Sukhleen.pdf 📄

☐ Use an existing configuration file

If you have used this importer before, you may have saved the configuration you used.
You can use that configuration again to save time.

4. Generate Different Types of Reports:

- Navigate to your Agile board.
- Click on "Reports" in the board menu.
- Choose from various reports like Burndown Chart, Sprint Report, Velocity Chart, etc. Issue Navigator Reports:
- Use the issue navigator to create custom reports.
- Perform a search to filter the issues you want to include.
- Click on "Tools" > "Issues" > "Search for Issues."
- Choose "Switch to List View" to customize columns.
- Save the filter and share it with others.

Learning outcomes (What I have learnt):

1. Understood how to create, edit, and manage issues effectively in a project.
2. Converted issues into sub-tasks and vice versa for better task breakdown.
3. Applied operations like edit, move, email, and label issues for proper organization.
4. Used Jira dashboards to visualize project progress and track activities.
5. Performed advanced search using filters and JQL to find specific tasks quickly.
6. Log work hours and manage time tracking within issues.

Evaluation Grid:

Sr. No.	Parameters	Marks Obtained	Maximum Marks
1.	Demonstration and Performance		12
2.	Worksheet		8
3.	Viva		10
